**DETAILED ACTION**

1. This communication is responsive to Amendment filed 10/03/2008.
2. Claims 43-81 are pending in this application. Claims 43, 55 and 69 are independent claims. In Amendment, claims 43, 55 and 69 are amended. This Office Action is made final.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 43-81 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 43-81 cite a device, medium, and system for performing polynomial operation in accordance with a mathematical algorithm. However, claims 43-81 merely disclose series mental steps/components for performing polynomial operation without disclosing a practical/physical application. Device and system claims 43-54 and 69-81 are just merely directing mathematical steps for performing polynomial using general components for storing without specific any specialized hardware for implementation. Therefore, claims 43-81 are directed to non-statutory subject matter.

***Allowable Subject Matter***

5. Claims 43-81 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 101 set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

6. Applicant's arguments filed 10/03/2008 have been fully considered but they are not persuasive.

a. The applicant mentioned in page 10 for claims rejected under 35 U.S.C. 101 that the claims 43 and 55 recite in part an array unit responsive to instruction; a carry propagation adder, and a register. Further, claim 69 recites in part, "a memory coupled to the processor for performing multiplication".

The examiner respectfully submits that the amendment does not sufficiently overcome the rejection under 35 U.S.C. 101 since the amendment along with argument/statement only directs the claims having the general components in the computer for performing the mathematical operations. In another words, the claims disclose an abstract idea or mathematical operation(s) in a generic computer which is not sufficiently to be statutory. As clearly addressed above, the claims must include a practical application of having or performing the above polynomial operation.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
